Q.47 As you may have heard, the Obama Administration and the Congress are likely to introduce a major recovery package to create four million new jobs and jump start the economy. The plan would invest in infrastructure projects like roads, bridges, schools and invest new energy, cut taxes and extend unemployment and health care benefits for workers who have lost their jobs. It is likely that this package will cost as much as 850 billion dollars over two years. From what you have heard, do you favor or oppose this plan?

Q.48 (SPLIT C) Some people have argued that while the economic recovery plan could help create hundreds of thousands of new construction jobs, it will not create many jobs that women traditionally do or are trained to do. Generally speaking, do you think this is a major problem, a minor problem, not much of a problem or no problem at all with the stimulus package?

Congress is now considering legislation that makes it easier for employees to form unions. The legislation is called the Employee Free Choice Act. Under the new law, employees would have the freedom to choose which method they use to determine whether or not they have a union. This new law allows employees to choose, without interference from management, between signing authorization cards or holding secret ballot elections. Under current law, management makes that choice. It would also strengthen penalties for companies that illegally intimidate or fire employees who try to form a union and establishes binding arbitration in cases where a company and a newly certified union cannot agree on a contract after three months of negotiating. Having heard this, do you favor or oppose the Employee Free Choice Act?
